## The Standard for Livestock Wellness

Located in the heart of lowa, we travel the country utilizing non-invasive, drug-free PEMF for the health and wellness of all animals and their human companions. Using PEMF technology, we've served champions and commercial stock of all species inside and outside the ring. Book a session or come see us at livestock shows around the country. Scan the QR code to learn more or book a session. Good luck to all exhibitors and our clients this show season!
